

Safety Is In Your Hands

Why Use Safety Gloves?

- » Accident prevention
- » ANSI compliant
- » Chemical protection
- » Thermal protection
- » Abrasion protection
- » High temperature protection

Protection for Your Hands

It is critical that employees use gloves specifically designed for the hazards in their unique work environment. Based on the specific task at hand, there are different gloves designed to protect the individual from accidents.

Therefore, it is important to choose the right type of glove based on your specific needs.

Types of Protective Gloves / Applications

- **Cotton & fabric:** Keeps hands clean and protects against abrasions
- **Coated fabric:** Provides protection against some moderate concentrated chemicals
- **Rubber, plastic or synthetic:** Use when cleaning or working with oils, solvents and other chemicals
- **Aluminized:** Use when welding, furnace and foundry work
- **Kevlar:** Best for a wide variety of industrial applications. Resistant against cuts and abrasions; provides protection against both heat and cold
- **Chemical/liquid-resistant:** Several types of gloves help protect against specific chemicals such as neoprene and nitrile gloves

Gale Supply Co. provides you with affordable and effective safety gloves that promotes a clean and healthy workplace.

Healthy Hygiene Starts Here

Hand Hygiene Your Way

- » Touch-free dispensers
- » Foam soap
- » Hand cleaners
- » Antibacterial & antimicrobial soap
- » Gentle Wipes

Skin Care

Our wide range of skin care products helps keep everyone happy and healthy at the workplace. This "do-it-yourself" vaccine is a simple yet effective way to prevent the spread of germs.

From touch-free dispensers to instant hand sanitizers, you can promote a clean, safe and healthy environment.

Hand Hygiene 101

- Good hand washing is the first line of defense against the spread of many illnesses
- Washing your hands for at least 20 seconds is the recommended time to help reduce risks like the flu, food poisoning and other associated infections
- Glove use is not a suitable substitute for washing your hands
- If soap and water are not available, use an alcohol-based hand sanitizer that contains at least 60% alcohol

Gale Supply Co. provides you with affordable and effective skin care that promotes a clean and healthy workplace.

- » **Head Protection**
- » **Work wear**

Why Wear Personal Protection Equipment (PPE)?

Hazards exist in every workplace in many different forms and therefore, can cause potentially dangerous situations. Controlling a hazard at its source is the best way to protect your employees.

Depending on the hazard or workplace conditions, OSHA recommends the use of PPE to create a barrier between the hazard and the employees.

Protection Goes Far

- Only 1% of approximately 770 workers suffering face injuries were wearing face protection
- Exposure to high noise levels can cause irreversible hearing loss or impairment. It can also create physical and psychological stress
- 84% of employees who sustain a head injury were not wearing head protection
- 25% of all workplace accidents involve hands and fingers

Gale Supply Co. provides you with affordable and effective safety supplies that promotes a healthy and safe workplace.
